About Me

I am an Indy based web developer and soldier with experience in front end and back end web development. I have worked with many modern development technologies, with particular expertise in JavaScript, React, RESTful API's, and UI design.

Education

Eleven Fifty Academy, Full-Stack Development, 09/2019-Present
- Learn to code web pages using HTML, CSS, and JavaScript.
- Version control and collaborative software development with Git and GitHub.
- Building secure full-stack applications by leveraging common design and architectural patterns like MVC and REST.
- Safely modeling and storing data in SQL and NoSQL databases.
- Consuming and integrating third-party API's in an application.
- Front-end web application development with modern JavaScript frameworks such as Angular or React.

Experience

US Army, 04/2018-Present
Infantryman:
- Trained in combat, life saving techniques, and physical performance.
- Partake in combat patrols on foot and in vehicles.
- Evaluate terrain and record topographical information.
- Work and train in squads of 10-13 in modern combat scenarios.
- Trained and qualified in firing/assembling carbine rifles and assault weapons.
- Learn about leadership and teamwork through vigorous, high-stress training.

Infantry Team Leader:
- Directly responsible for the well being, physical readiness, morale, and discipline of 3-4 soldiers within a 13-man squad.
- Lead team of soldiers through modern combat scenarios.
- Responsible of the individual training and maintenance of their equipment.

Guitar Center, 05/2018-04/2019
Lessons Manager:
• Managed Guitar Center lessons department.
• Coordinated scheduling between students/instructors.
• Created advertisements promoting the lessons program.
• Ensured student and instructor success by tracking student progress and discussing teaching techniques with instructors.
• Hosted/coordinated lessons sponsored events such as open houses, jam nights, and recitals.
• Oversaw a team of instructors and accommodate accordingly to their needs/wants.

Drum Sales Associate:
• Recommended merchandise based on customer needs.
• Interfaced with customers, determine needs, provide recommendations, and up-sell services.
• Increased purchase totals by recommending additional items/programs such as memberships and store sponsored credit cards.
• Described merchandise and explain product operation to customers.
• Maintained knowledge of current promotions, exchange guidelines, payment policies, and security practices.
